

Compare Our Horizontal Flow Wrapper Models

This comparison table outlines the key specifications of our horizontal flow wrapper models in a clear, structured format, allowing you to easily compare jaw width, maximum film size, sealing configuration, and speed capability across the range.

It's designed to help you identify the most suitable flow wrapper for your production requirements, from compact entry-level machines through to high-speed systems.

Model	Jaws	Max Film	Pre- Heaters	Hot -Wheels	Motorised Film	Auto Splice	Comment
